**frontside of the stand**  
(walkway)

**Please consider the following points when planning your flagpoles and flags:**

- for **each flagpole**, one ground-screw or flagpole-stand has to be ordered.
- in some areas, **limited construction heights** have to be considered – especially in the field of the runway, aisles C, D and E
- for all **stands on grass area**, the flagpoles have to be indented by one meter from the frontside of the stand (walkway)
- in **grass areas with prohibition of bolting**, no mounting of flagpoles with ground screws or flagpole stand with concrete-slab is possible  
**as an ALTERNATIVE, we offer drivable flagpole stands** (for flagpoles height 6,0m )  
**TO BUY – please contact us!**
- in **areas with concrete**, necessarily flagpole-stands have to be planned (flagpoles max. 7,00m h.o.g.)
- in case of **outrigger-flagpoles** (Pos. 1.2):
  - minimum distance between flagpoles:                      3.20 m (2.20 m for h.o.g. 5.40m)
  - distance to border of stand/ adjoining stand:                      1.50 m (1.00 m for h.o.g. 5.40m)
  - (In cases of eventually occurring conflicts with flagpoles on the adjoining stands we will contact you.)
- basically, the **Technical Instructions – 5.2 to 5.4** – have to be observed

**We will be glad to advise you on the planning**  
**Odette Philipp or Claudia Wegener**

**– please do not hesitate to call us:**  
**phone (+49) 52 54/ 66 06 86**
